## English for Medical Purposes 2026

Course leader: Jerome Tessuto

### Course Overview

The English Language Chair will be holding the [6th English for Medical Purposes Course](#) designed for candidates enrolled at the [Doctoral Degrees](#) and [Specialist Schools](#) listed above. This is an **on-site teacher-led compact course only**. It is expertly designed to give candidates the specialist English language knowledge and skills they need to communicate in academic and professional medical settings alongside an orientation to the practical approaches to discourse- and genre-informed theory relevant to [English for Medical Purposes](#). This course will particularly focus on scientific writing.
