Trainer

Claudia Iasillo joined APRE in 2018. She holds a MSc degree in Biotechnology and a PhD in Molecular Biology from Aarhus University, in collaboration with the French IGMM (Institut de Génétique Moléculaire de Montpellier). After the PhD, she studied science communication and public engagement in science activities in the post-graduation course "Life science communication" at La Sapienza, University of Rome, with a specific focus on science journalism and institutional communication. In APRE she works as project manager mainly on science and society relationship related projects. She is experienced in science communication, Open Science, Citizen Science, stakeholder and public engagement, community building and capacity building. Since she has joined APRE she has been involved in several EU funded projects and she is coordinating the H2020 project [TIME4CS](#) and the HE projects [BlueRev](#) and [PATTERN](#).
